The Forgotten Lunar Calendar

In January 1966, the island nation of Ceylon spurned the near-universal Gregorian calendar, defined by the Earth's orbit around the Sun, for one aligned with the waxing and waning of the Moon. Driven by notions of national identity and forces of political ambition, the calendrical change sparked ideological debate and real-world disruption – at once a defiant symbol and a curious anomaly. **Just a Phase: The Forgotten Lunar Calendar** examines this bewildering yet bold five-year experiment, tracing the course of a remarkable episode in the country's contemporary history.

59 Minutes | Documentary Feature | Sri Lanka
